- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

1. Claims 3 and 4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 6.

2. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

No basis can be found in the specification for the terms "first cooperating mechanical means" and "second cooperating mechanical means". Since it is not clear what is being referred to, the scope of the claim is unclear.

On line 13 of claim 1, "a blade-holding magazine" should be --wherein said blade-holding magazine is--, since it has already been recited.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Esterly '519 in view of Rom '925.

Esterly shows a head assembly with most of the recited limitations, including an oblique channel (41), a slide (57) having a depth limiter (42,43) and a blade magazine (32,36,38).

Esterly's blade magazine does not appear to be depth adjustable on the slide. However, Rom shows that it is well known to adjust for depth-of-penetration by using a fastener (64, lines 7,8, column 4). It would have been obvious to one of ordinary skill in the art to have modified Esterly by making the blade magazine slide in a channel with an adjustment mechanism, as suggested by Esterly, in order to better adjust the depth-of-penetration.

5. Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. In regards to claim 1, made of record are patents to Schwartz, Ellerin, Mood, Kozyrski and Kozyrski showing pertinent mat cutters.

In regards to claim 2, made of record are patents to Meyerle and Miller, who show tool guided by linear bearings. Due to the different nature of the tools and bearings, it would not have been obvious to combine these references with Esterly to arrive at the invention of claims 2.

Also in regards to claim 2, made of record is a patent to Gilbert showing a linear bearing of the type claimed by Applicant, but with no suggestion to combine with the likes of Esterly.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson whose telephone number is 703-308-2186. The examiner can normally be reached on Monday thru Thursday between 7am and 4pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9302. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
